2.1: flammable gas.
2 Hazards identification (continued)

- Hazard pictograms code : GHS02 - GHS04
- Signal word : Danger
- Hazard statements :
  - H220 : Extremely flammable gas.
  - H280 : Contains gas under pressure; may explode if heated.
- Precautionary statements
  - Prevention : P210 : Keep away from heat/sparks/open flames/hot surfaces. – No smoking.
  - Response : P377 : Leaking gas fire: Do not extinguish, unless leak can be stopped safely.
  - P381 : Eliminate all ignition sources if safe to do so.
  - Storage : P403 : Store in a well-ventilated place.
- Labelling EC 67/548 or EC 1999/45
- Symbol(s) :
  - F+ : Extremely flammable
  - R Phrase(s) : R12 : Extremely flammable.
  - S Phrase(s) : S9 : Keep container in a well-ventilated place.
  - S16 : Keep away from sources of ignition - No smoking.
  - S33 : Take precautionary measures against static discharges.

Other hazards

Other hazards :

3 Composition/information on ingredients

<table>
<thead>
<tr>
<th>Substance / Preparation</th>
<th>: Substance.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Substance name</td>
<td>Contents</td>
</tr>
<tr>
<td>Dimethylsilane</td>
<td>100 %</td>
</tr>
</tbody>
</table>

Contains no other components or impurities which will influence the classification of the product.

Note 1: Listed in Annex IV / V REACH, exempted from registration.

Note 2: Registration deadline not expired.

Full text of R-phrases see chapter 16

4 First aid measures

First aid measures

- Inhalation : In high concentrations may cause asphyxiation. Symptoms may include loss of mobility/consciousness. Victim may not be aware of asphyxiation.
  In low concentrations may cause narcotic effects. Symptoms may include dizziness, headache, nausea and loss of co-ordination.
  Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Apply artificial respiration if breathing stopped.

- Skin/eye contact : Immediately flush eyes thoroughly with water for at least 15 minutes.

- Ingestion : Ingestion is not considered a potential route of exposure.
### 5 Fire-fighting measures

<table>
<thead>
<tr>
<th>Specific hazards</th>
<th>Exposure to fire may cause containers to rupture/explode.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hazardous combustion products</td>
<td>Incomplete combustion may form carbon monoxide. Silica dust (inert - but may irritate respiratory tract and eyes).</td>
</tr>
</tbody>
</table>

#### Extinguishing media

- **Suitable extinguishing media**: Carbon dioxide. Dry powder. Foam. Water.
- **Unsuitable extinguishing media**: Halons.

#### Specific methods

- If possible, stop flow of product.
- Move away from the container and cool with water from a protected position.
- Do not extinguish a leaking gas flame unless absolutely necessary. Spontaneous/explosive re-ignition may occur. Extinguish any other fire.

#### Special protective equipment for fire fighters

- In confined space use self-contained breathing apparatus.

### 6 Accidental release measures

#### Personal precautions

- Wear self-contained breathing apparatus when entering area unless atmosphere is proved to be safe.
- Evacuate area.
- Ensure adequate air ventilation.
- Eliminate ignition sources.

#### Environmental precautions

- Try to stop release.
- Prevent from entering sewers, basements and workpits, or any place where its accumulation can be dangerous.

#### Clean up methods

- Ventilate area.
- Dust deposited may be vacuum cleaned or the area hosed down with water.

### 7 Handling and storage

#### Handling

- Take precautionary measures against static discharge.
- Suck back of water into the container must be prevented.
- Purge air from system before introducing gas.
- Do not allow backfeed into the container.
- Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt.
- Keep away from ignition sources (including static discharges).
- Refer to supplier’s container handling instructions.

#### Storage

- Segregate from oxidant gases and other oxidants in store.
- Keep container below 50°C in a well ventilated place.

### 8 Exposure controls/personal protection

#### Personal protection

- Ensure adequate ventilation.
- Do not smoke while handling product.

### 9 Physical and chemical properties

#### Physical state at 20 °C

- Gas.

#### Colour

- Colourless gas.

#### Odour

- Not known.

10 Stability and reactivity

| Hazardous decomposition products           | None.       |
| Incompatible materials                     | Can form explosive mixture with air. May react violently with oxidants. Air, Oxidiser. |
| Conditions to avoid                        | Keep away from heat/sparks/open flames/hot surfaces. – No smoking. |

11 Toxicological information

| Toxicity information                       | May cause nausea and irritation of the respiratory tract. Hydrolysis of silanes in the body forms silicic acid or hydrated silica. |

12 Ecological information

| Ecological effects information             | No known ecological damage caused by this product. |

13 Disposal considerations

| General                                    | Do not discharge into areas where there is a risk of forming an explosive mixture with air. Waste gas should be flared through a suitable burner with flash back arrestor. Gases formed by combustion should be washed with water to remove silica. Do not discharge into any place where its accumulation could be dangerous. Contact supplier if guidance is required. |

14 Transport information

| UN number                                  | 3161        |
| Labelling ADR, IMDG, IATA                 |             |

14 Transport information (continued)

Land transport

ADR/RID

H.I. nr : 23
UN proper shipping name : LIQUEFIED GAS, FLAMMABLE, N.O.S. (Dimethylsilane)
Transport hazard class(es) : 2
- ADR/RID Classification code : 2 F
  - Packing Instruction(s) - General : P200
- Tunnel Restriction
  : B/D Tank carriage: Passage forbidden through tunnels of category B, C, D and E; Other carriage: Passage forbidden through tunnels of category D and E

Sea transport

- IMO-IMDG code
  • Proper shipping name : LIQUEFIED GAS, FLAMMABLE, N.O.S. (Dimethylsilane)
  • Class : 2.1
- IMO Packing group : P200
- Emergency Schedule (EmS) - Fire : F-D
- Emergency Schedule (EmS) - Spillage : S-U
- Instructions - Packing : P200

Air transport

- ICAO/IATA
  • Proper shipping name : LIQUEFIED GAS, FLAMMABLE, N.O.S. (Dimethylsilane)
  • Class : 2.1
  • Passenger and Cargo Aircraft :
  • Cargo Aircraft only :
    - Packing instruction : 200

Avoid transport on vehicles where the load space is not separated from the driver's compartment.
Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency.
Before transporting product containers :
- Ensure that containers are firmly secured.
- Ensure cylinder valve is closed and not leaking.
- Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
- Ensure valve protection device (where provided) is correctly fitted.
- Ensure there is adequate ventilation.
- Compliance with applicable regulations.

15 Regulatory information

Safety, health and environmental regulations/legislation specific for the substance or mixture : Ensure all national/local regulations are observed.
15 Regulatory information (continued)

Seveso regulation 96/82/EC : Listed

16 Other information

Ensure operators understand the flammability hazard.
Contact with liquid may cause cold burns/frostbite.
The hazard of asphyxiation is often overlooked and must be stressed during operator training.

List of full text of R-phrases in section 3.

This Safety Data Sheet has been established in accordance with the applicable European Directives and applies to all countries that have translated the Directives in their national laws.

DISCLAIMER OF LIABILITY : Details given in this document are believed to be correct at the time of going to press. Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted. Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out.
