### ≤5% CO2, ≤35% Nitrogen in Helium

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 Reference number: SDS 00585

### **SECTION 3: Composition/information on ingredients**

#### 3.1. Substances

Not applicable

### 3.2. Mixtures

Full text of H- and EUH-statements: see section 16

Contains no other components or impurities which will influence the classification of the product.

\*1: Listed in Annex IV / V REACH, exempted from registration.

\*3: Registration not required: Substance manufactured or imported < 1t/y.

# SECTION 4: First aid measures 4.1. Description of first aid measures - Inhalation : Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Perform cardiopulmonary resuscitation if breathing stopped.

- Skin contact : Adverse effects not expected from this product.
- Eye contact
   Ingestion
   Adverse effects not expected from this product.
   Ingestion is not considered a potential route of exposure.

### 4.2. Most important symptoms and effects, both acute and delayed

In high concentrations may cause asphyxiation. Symptoms may include loss of mobility/consciousness. Victim may not be aware of asphyxiation. See section 11.

4.3. Indication of any immediate medical attention and special treatment needed

None.

| SECTION 5: Firefighting measures                           |                                                                                                                 |  |

|                                                                          | See also sections 8 and 13.                                                                                                                                                                                                                                                                                                                                                       |  |

### SECTION 7: Handling and storage

### 7.1. Precautions for safe handling Safe use of the product : Do not breathe gas. Avoid release of product into atmosphere. The product must be handled in accordance with good industrial hygiene and safety procedures. Only experienced and properly instructed persons should handle gases under pressure. Consider pressure relief device(s) in gas installations. Ensure the complete gas system was (or is regularily) checked for leaks before use. Do not smoke while handling product. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Avoid suck back of water, acid and alkalis.

### ≤5% CO2, ≤35% Nitrogen in Helium

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 Reference number: SDS 00585

| Safe handling of the gas receptacle                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <ul> <li>Refer to supplier's container handling instructions.</li> <li>Do not allow backfeed into the container.</li> <li>Protect containers from physical damage; do not drag, roll, slide or drop.</li> <li>When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders.</li> <li>Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use.</li> <li>If user experiences any difficulty operating valve discontinue use and contact supplier.</li> <li>Never attempt to repair or modify container valves or safety relief devices.</li> <li>Damaged valves should be reported immediately to the supplier.</li> <li>Keep container valve outlets clean and free from contaminants particularly oil and water.</li> <li>Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment.</li> <li>Close container valve after each use and when empty, even if still connected to equipment.</li> <li>Never use direct flame or electrical heating devices to raise the pressure of a container.</li> <li>Do not remove or deface labels provided by the supplier for the identification of the content of the container.</li> </ul> |

Appropriate engineering controls          |                                                                                                                                                                                                                                                                                                                                                                   |
|                                                  | Provide adequate general and local exhaust ventilation.<br>Systems under pressure should be regularily checked for leakages.<br>Ensure exposure is below occupational exposure limits (where available).<br>Oxygen detectors should be used when asphyxiating gases may be released.<br>Consider the use of a work permit system e.g. for maintenance activities. |
| 8.2.2. Individual protection measures, e.g. pers | sonal protective equipment                                                                                                                                                                                                                                                                                                                                        |
|                                                  | A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk. The following recommendations should be considered:<br>PPE compliant to the recommended EN/ISO standards should be selected.                                                   |
| Eye/face protection                              | : Wear safety glasses with side shields.<br>Standard EN 166 - Personal eye-protection - specifications.                                                                                                                                                                                                                                                           |
| Skin protection                                  |                                                                                                                                                                                                                                                                                                                                                                   |

### ≤5% CO2, ≤35% Nitrogen in Helium

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 Reference number: SDS 00585

| - Hand protection                      | : Wear working gloves when handling gas containers.                                                                                              |
|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
|                                        | Standard EN 388 - Protective gloves against mechanical risk, performance level 1 or higher.                                                      |
| - Other                                | : Wear safety shoes while handling containers.                                                                                                   |
|                                        | Standard EN ISO 20345 - Personal protective equipment - Safety footwear.                                                                         |
| Respiratory protection                 | : Gas filters may be used if all surrounding conditions e.g. type and concentration of the contaminant(s) and duration of use are known.         |
|                                        | Use gas filters with full face mask, where exposure limits may be exceeded for a short-term period, e.g. connecting or disconnecting containers. |
|                                        | Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full                                                       |
|                                        | face mask.                                                                                                                                       |
|                                        | Gas filters do not protect against oxygen deficiency.                                                                                            |
|                                        | Self contained breathing apparatus (SCBA) or positive pressure airline with mask are to be<br>used in oxygen-deficient atmospheres.              |
|                                        | Standard EN 14387 - Gas filter(s), combined filter(s) and standard EN136, full face masks .                                                      |
| Thermal hazards                        | : None in addition to the above sections.                                                                                                        |
| 8.2.3. Environmental exposure controls |                                                                                                                                                  |
|                                        | None necessary.                                                                                                                                  |

### SECTION 9: Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

| Appearance                                      |                                                                                         |
|-------------------------------------------------|-----------------------------------------------------------------------------------------|
| - Physical state at 20°C / 101.3kPa             | : Gas.                                                                                  |
| - Colour                                        | : Colourless.                                                                           |
| Odour                                           | : Odourless.                                                                            |
| Melting point / Freezing point                  | : Not applicable for gas mixtures.                                                      |
| Boiling point                                   | : Not applicable for gas mixtures.                                                      |
|                                                 | It is technically not possible to determine the boiling point or range of this mixture. |
|                                                 | Component with lowest boiling point: Helium -269 °C                                     |
| Flammability                                    | : Non flammable.                                                                        |
| Lower explosion limit                           | : Not available.                                                                        |
| Upper explosion limit                           | : Not available.                                                                        |
| Flash point                                     | : Not applicable for gas mixtures.                                                      |
| Auto-ignition temperature                       | : Non flammable.                                                                        |
| Decomposition temperature                       | : Not applicable.                                                                       |
| рН                                              | : Not applicable for gas mixtures.                                                      |
| Viscosity, kinematic                            | : Not applicable.                                                                       |
| Water solubility [20°C]                         | : Mixture is partially soluble in water                                                 |
| Partition coefficient n-octanol/water (Log Kow) | : Not applicable for gas mixtures.                                                      |
| Vapour pressure [20°C]                          | : Not applicable.                                                                       |
| Vapour pressure [50°C]                          | : Not applicable.                                                                       |
| Density and/or relative density                 | : Not applicable.                                                                       |
| Relative vapour density (air=1)                 | : Lighter or similar to air.                                                            |
| Particle characteristics                        | : Not applicable.                                                                       |
|                                                 |                                                                                         |

### 9.2. Other information

| 9.2.1. Information with regard to physical hazard classes |                                    |  |
|-----------------------------------------------------------|------------------------------------|--|
| Explosive properties                                      | : Not applicable.                  |  |
| Explosion limits                                          | : Non flammable.                   |  |
| Oxidising properties                                      | : Not applicable.                  |  |
| 9.2.2. Other safety characteristics                       |                                    |  |
| Molar mass                                                | : Not applicable for gas mixtures. |  |
| Evaporation rate                                          | : Not applicable for gas mixtures. |  |
| Other data                                                | : None.                            |  |
|                                                           |                                    |  |

### ≤5% CO2, ≤35% Nitrogen in Helium

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 Reference number: SDS 00585

| SECTION 10: Stability and reactivity     |                                                                                                                              |  |

|                                          | No reactivity hazard other than the effects described in sub-sections below.<br>Data for mixture are not available.<br>None. |  |
| 10.2. Chemical stability                 |                                                                                                                              |  |
|                                          | Stable under normal conditions.                                                                                              |  |
| 10.3. Possibility of hazardous reactions |                                                                                                                              |  |
|                                          | None.                                                                                                                        |  |
| 10.4. Conditions to avoid                |                                                                                                                              |  |
|                                          | None.                                                                                                                        |  |
|                                          | Avoid moisture in installation systems.                                                                                      |  |
| 10.5. Incompatible materials             |                                                                                                                              |  |
|                                          | None.                                                                                                                        |  |
|                                          | For additional information on compatibility refer to ISO 11114.                                                              |  |
| 10.6. Hazardous decomposition products   |                                                                                                                              |  |
|                                          | Under normal conditions of storage and use, hazardous decomposition products should not be produced.                         |  |

# SECTION 11: Toxicological information 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

| Acute toxicity                        | : Toxicological effects not expected from this product if occupational exposure limit values are not exceeded. |
|---------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Skin corrosion/irritation             | : No known effects from this product.                                                                          |
| Serious eye damage/irritation         | : No known effects from this product.                                                                          |
| Respiratory or skin sensitisation     | : No known effects from this product.                                                                          |
| Germ cell mutagenicity                | : No known effects from this product.                                                                          |
| Carcinogenicity                       | : No known effects from this product.                                                                          |
| Toxic for reproduction : Fertility    | : No known effects from this product.                                                                          |
| Toxic for reproduction : unborn child | : No known effects from this product.                                                                          |
| STOT-single exposure                  | : No known effects from this product.                                                                          |
| STOT-repeated exposure                | : No known effects from this product.                                                                          |
| Aspiration hazard                     | : Not applicable for gases and gas mixtures.                                                                   |
| 11.2. Information on other hazards    |                                                                                                                |

No additional information available

### **SECTION 12: Ecological information**

### 12.1. Toxicity

| Assessment                      |  |
|---------------------------------|--|
| EC50 48h - Daphnia magna [mg/l] |  |
| EC50 72h - Algae [mg/l]         |  |
| LC50 96 h - Fish [mg/l]         |  |

: No ecological damage caused by this product.

- : No data available.
- : No data available.
- : No data available.

### ≤5% CO2, ≤35% Nitrogen in Helium

# SECTION 13: Disposal considerations 13.1. Waste treatment methods May be vented to atmosphere in a well ventilated place. Do not discharge into any place where its accumulation could be dangerous. Return unused product in original container to supplier. List of hazardous waste codes (from Commission Decision 2000/532/EC as amended) : 16 05 05 : Gases in pressure containers other than those mentioned in 16 05 04. 13.2. Additional information External treatment and disposal of waste should comply with applicable local and/or national regulations.

: 1956

### ≤5% CO2, ≤35% Nitrogen in Helium

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 Reference number: SDS 00585

### **SECTION 14: Transport information**

### 14.1. UN number or ID number

In accordance with ADR / RID / IMDG / IATA / ADN UN-No.

### 14.2. UN proper shipping name

Transport by road/rail (ADR/RID) Transport by air (ICAO-TI / IATA-DGR) Transport by sea (IMDG)

# COMPRESSED GAS, N.O.S. (Helium, Nitrogen) Compressed gas, n.o.s. (Helium, Nitrogen) COMPRESSED GAS, N.O.S. (Helium, Nitrogen)

### 14.3. Transport hazard class(es)

Transport by road/rail (ADR/RID)

Transport by air (ICAO-TI / IATA-DGR)

Hazard identification number

Class / Div. (Sub. risk(s))

Transport by sea (IMDG) Class / Div. (Sub. risk(s))

14.4. Packing group

Transport by sea (IMDG)

Emergency Schedule (EmS) - Fire

Transport by road/rail (ADR/RID)

<u>14.5. Environmental hazards</u> Transport by road/rail (ADR/RID)

Emergency Schedule (EmS) - Spillage

Transport by air (ICAO-TI / IATA-DGR)

#### Packing Instruction(s)

Transport by sea (IMDG)

Transport by road/rail (ADR/RID) Transport by air (ICAO-TI / IATA-DGR) Passenger and Cargo Aircraft Cargo Aircraft only Transport by sea (IMDG)

Special transport precautions

- : None
- : P200.
- : 200.
- : 200.
- : P200.
- : Avoid transport on vehicles where the load space is not separated from the driver's compartment.

Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency.

- Before transporting product containers:
- Ensure there is adequate ventilation.
- Ensure that containers are firmly secured.
- Ensure valve is closed and not leaking.
- Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
- Ensure valve protection device (where provided) is correctly fitted.

Classification in accordance with the procedures and calculation methods of Regulation (EC) 1272/2008 (CLP).

Further information

### ≤5% CO2, ≤35% Nitrogen in Helium

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878 Reference number: SDS 00585

|------------------------------------|-----------------------------------------------------|
| H280                               | Contains gas under pressure; may explode if heated. |
| Press. Gas (Comp.)                 | Gases under pressure : Compressed gas               |
| Press. Gas (Liq.)                  | Gases under pressure : Liquefied gas                |

DISCLAIMER OF LIABILITY

: Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out.

Details given in this document are believed to be correct at the time of going to press. Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted.
